BADHUSHA D

JUNIOR BACKEND DEVELOPER | JAVA | FULL STACK DEVELOPER

9994686205 | badhushad0@gmail.com | Tiruchirappalli, Tamil Nadu
Linkedin | Github | Portfolio

Career Summary

Junior Backend Developer and Full Stack Web Developer with hands-on experience developing backend APIs, database-driven applications, and responsive web applications. Strong foundation in Java and Spring fundamentals with practical experience in FastAPI, React.js, PostgreSQL, and MySQL. Experienced in developing multi-portal, role-based systems, employee attendance management, and OTT movie discovery applications with REST API integration, database management, user account functionality, reporting and application deployment. Interested in backend engineering and building scalable, reliable and user-focused software applications.

Core Strength and Skills

- Strong foundation in **Java** and Object-Oriented Programming, with knowledge of **Spring Framework fundamentals**.
- Hands-on experience developing backend applications and **REST APIs using FastAPI**.
- Full-stack web development experience using **React.js, JavaScript, HTML, CSS, FastAPI, PostgreSQL, and MySQL**.
- Experience designing and maintaining **multi-portal, role-based systems** with interconnected dashboards and stage-based workflow tracking.
- Experience working with relational databases and implementing database-driven application functionality.
- Experience developing an employee attendance system with daily attendance tracking, Excel/CSV data handling, employee management, and reporting.
- Experience developing an OTT movie platform with language-based movie discovery, user account management, movie information, and watchlist functionality.
- Familiar with **Git, GitHub, Vercel, Render and MinIO** for development, source-code management, deployment and storage requirements.
- Strong problem-solving skills with an interest in Java backend development, Spring-based applications, REST APIs, databases and full-stack web development.

Technical Skills

Programming Languages	Java, JavaScript, HTML, CSS
Backend	FastAPI, Spring Framework Fundamentals, REST APIs
Frontend	React.js, JavaScript, HTML5, CSS3
Databases	PostgreSQL, MySQL
Tools	Git, GitHub, MinIO
Hosting / Deployment	Vercel, Render
Development	Backend Development, Full Stack Web Development, API Integration, Database-Driven Applications

Certifications

- **Application Developer – Web & Mobile** **NSQF Level 5**
  Successfully cleared the assessment for the Application Developer – Web & Mobile qualification with **Grade A**. Completed **540 hours** of training through the IT-ITeS Sector Skill Council / NCVET.
- **Full Stack Development Internship**
  NoviTech R&D Private Limited — Successfully completed a one-month internship in Full Stack Development from September 04, 2024 to October 14, 2024.
- **React JS Bootcamp**
  NoviTech R&D Private Limited — Successfully completed a 2-hour React JS Bootcamp on September 27, 2024.

Professional Experience

iZone Technologies **2026 – Present**
Junior Backend Developer

- Working as a Junior Backend Developer, contributing to backend application development and web application functionality.
- Working with backend application logic, APIs, databases, and frontend-backend integration.
- Applying Java and Spring fundamentals in backend development and application maintenance.

Freelance **2025 – 2026**
Full Stack Web Developer

- Developed full-stack web applications using React.js, FastAPI, PostgreSQL and MySQL.
- Developed responsive frontend interfaces and integrated them with backend REST APIs.
- Designed and implemented database-driven application functionality using PostgreSQL and MySQL.
- Used Git and GitHub for source-code management and deployed web applications using Vercel and Render.

Projects

Multi-Portal CRM System *React.js, FastAPI, PostgreSQL/MySQL*

- Designed and maintain a role-based CRM system made up of 10 interconnected portals operating within a single unified workflow architecture.
- Built a CEO portal that seeds initial system data and creates employee accounts, which in turn provisions a separate role-based portal for each employee.
- Developed individual employee dashboards (portals) so each employee accesses only the data and functionality relevant to their assigned role.
- Structured the system around a stage-by-stage workflow, with each stage completed and signed off by the responsible employee and their department head before moving to the next stage.
- Implemented a final customer feedback stage to close out the workflow once all preceding stages are completed.
- Built CEO-level monitoring functionality to track real-time stage completion and overall workflow progress across all employee portals.
- Continue to independently maintain and extend the system, managing feature updates and workflow consistency across all 10 portals.

OTT Movie Discovery Platform *React.js, FastAPI, MySQL*

- Developed a full-stack OTT movie platform that enables users to discover movies based on their preferred language.
- Implemented movie discovery and browsing functionality with movie details, genres, ratings, posters, release information and video content.
- Integrated external movie data through APIs to provide up-to-date movie information.
- Developed user account functionality allowing users to manage their profiles and account information.
- Implemented a personal **watchlist** allowing users to add, view, and remove movies for easier access.
- Implemented a user support/request option for users to submit requests related to unavailable movies or preferred language content.

Employee Attendance Management System *React.js, FastAPI, PostgreSQL*

- Developed a web-based attendance management system designed for managing **employee attendance** and related records.
- Implemented employee management functionality including employee details, department assignment, search, editing and record management.
- Developed **day-based attendance tracking** with attendance statuses including Present, Half Day, and Leave.
- Implemented attendance data processing using **Excel/CSV-based daily data** for uploading and managing attendance records.
- Developed dashboard functionality to display employee attendance information, employee counts, leave information and attendance statistics.
- Implemented date-based and date-range attendance reporting with filtering and employee search functionality.
- Developed **Excel report generation** for attendance records containing employee and daily attendance information.

Education

Oxford Engineering College, Tiruchirappalli **2020 – 2024**
Bachelor of Engineering (B.E.) – Computer Science and Engineering
Anna University **CGPA: 7.5 / 10**

Bishop Heber Higher Secondary School, Teppakulam **2018 – 2020**
Higher Secondary Certificate (HSC) – Computer Science
